

CQL Narc-ID

Confident presumptive identification for the field testing of controlled substances.

The Rigaku CQL Narc-ID™ provides screening for narcotics, illicit drugs, cutting agents, or precursor chemicals in a simple and easy to use form factor. Utilizing 1064 nm Raman technology, means the CQL Narc-ID can scan colored, mixed, or dirty substances - even through colored packaging - keeping the user safe from exposure. Certified rugged, its easy to use operating software and SenseAlert alarm screening provide a non-technical user with a simple “red / green” result of a potential harmful material. Integrating the CQL Narc-ID into routine drug field testing, provides an advanced, yet simple experience, with unique features such as:

- Identify bulk and trace levels of substances (with optional QuickDetect™)
- Add pictorial evidence using on-board camera for traceability
- Operate a streamlined GUI via button or touchscreen
- Transfer results via Wi-Fi to create a PDF report
- Compatible with Rigaku's CommandSuite™ Fleet Management software
